Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 03 December 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Specification

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

2. The abstract of the disclosure is objected to because line 1 contains the implied phrase "is provided", and the abstract is too long, i.e. more than 150 words. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-2, 4, 6-9, 12, and 14-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Ushikawa (US6140256).

Ushikawa discloses a substrate processing method wherein the substrate is held by a holder (3), a heater (31) in the bottom of processing container, a lid body (21, 22) moveable up and down (Figure 1), supplying a processing fluid (64, 65), a valve in the supply line (64b, 65b), a fluid supply and drain (63, 63, 23), a controller (10) for controlling the close/apart motion of

Art Unit: 3742

the moving mechanism, a plurality of holding rods (41, 42, 43, 51, 52, 53) so as to penetrate the processing container movably in a fluid tight manner (Figure 1) comprising the steps of moving the substrate close to heater to heat to a processing temperature, moving the substrate apart from the heater to a processing position after heating to a processing temperature, supplying processing fluid (abstract), making the holder receive the substrate, discharging the processing fluid after supplying the processing fluid, opening a lid body, closing the lid body, after discharging the processing fluid again opening the lid body, transferring the substrate from the processing position to the delivery position and unloading the substrate, the flowing direction of the processing fluid is perpendicular to the holder, the controller controls the moving mechanism so that the substrate is delivered into the container and a processing position where the substrate is apart from the heating surface (column 5, line 6-column 6, line 54).

Allowable Subject Matter

5. Claims 3, 5, 10-11, 13, and 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shawntina T. Fuqua whose telephone number is (703) 305-2581. The examiner can normally be reached on Monday-Friday 8-4:30 pm.

Art Unit: 3742

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Teresa Walberg can be reached on (703) 308-1327. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
